

# Taaha Siddiqui

[www.linkedin.com/in/tahasidd](https://www.linkedin.com/in/tahasidd)

## SUMMARY

Ambitious Java/Spring Boot Developer Fresher with hands-on experience in Core Java, Spring Boot, REST APIs, and backend integrations through scalable projects. Strong understanding of application architecture, databases (PostgreSQL/MySQL), and Git for version control. Eager to lead backend development, mentor teams, and ensure high-quality standards in a collaborative environment. Exposure to cloud concepts via AWS simulation.

## EDUCATION

**Bachelor of Business Administration (Computer Applications) | SPPU | 2022 – 2025.**

**Master of Computer Applications – AI & ML | Amity University Online, India | (Pursuing).**

## EXPERIENCE

**UI/UX Design Assistant – Foxglue | Freelance | Sep 2024 – Dec 2024**

- Applied Figma to contribute to the visual design and layout of the company's website, enhancing aesthetic appeal and user navigation.
- Developed wireframes, page structures, and user flows to create intuitive navigation and a clean UI, streamlining user journeys
- Provided crucial feedback on design elements (color schemes, typography, responsive design) to ensure brand alignment and a cohesive user experience.

## PROJECTS

**AirVista – Airline Ticket Booking System | <https://github.com/TaahaSidd/AirVista>**

- Tech Stack: Java, Spring Boot, P-SQL, HTML/CSS, React.
- Developed a robust web-based airline ticket booking platform, designed to streamline flight search, seat selection, and user registration processes. Implemented admin panel for flight management and user-side booking flow.
- Implemented a comprehensive admin panel for efficient flight management and a user-side booking flow, improving operational control and enhancing the user booking experience.

**Agora – Student Marketplace App [Ongoing] | <https://github.com/TaahaSidd/Agora>**

- Leading development of a mobile-first marketplace app tailored for students to buy and sell items securely.
- Implemented OTP-based phone authentication via Firebase for secure onboarding.
- Currently developing in-app chat, listing filters, and moderation tools to ensure safe user interactions.
- Designed intuitive UI screens and workflows to ensure smooth mobile usability.
- Designed microservices-inspired architecture with Spring Boot APIs for real-time features (chat, filtering), user authentication, and secure integrations.

## SKILLS

- **Languages:** Java, JavaScript, Python, SQL.
- **Frameworks:** Spring Boot, React Native, React.js, Node.js.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **Cloud & DevOps:** Docker, Firebase, Git, GitHub, Postman, AWS.
- **Design & UI/UX:** Figma, Wireframing, Responsive Web Design, User Flow Design.
- **Core Concepts:** Object-Oriented Programming (OOP), RESTful APIs, Microservices, Agile

## CERTIFICATIONS

- UI/UX Design Certification – ITLH Global – 2024.
- Walmart USA - Advanced Software Engineering Job Simulation.
- AWS - Solutions Architecture Job Simulation.
- Deloitte - Cyber Job Simulation.
